Actinomycosis, spinal abscess and spondylitis due to, 487
Adam's bend test, diagnostic accuracy and reliability of, 796
Adolescents
  scoliosis in. *See* Scoliosis, adolescent
  standing sagittal spinal alignment in asymptomatic adolescents and adults compared and, 211
Age. *See also specific age groups*
  cervical spine injury threshold and, 1957
  at which back pain becomes common, 228
Amyloidomas
  cervical, 133
  primary, of spine, 497
Amyotrophy, cervical spondylosis and, magnetic resonance imaging demonstration of intrinsic cord pathology in, 448
Analgesia. *See also* Back pain; Low back pain; Pain
  epidural, Horner's syndrome after, 387
Anesthesia
  anesthetization of zygapophysial joint by lumbar branch blocks and, 1847
  facet joint, low back pain relieved by, capacity of clinical picture to characterize, 1972
  patient position and hypotensive anesthesia effects on inferior vena caval pressure and, 941
Aneurysmal bone cysts, management and outcome with, 621
Angiomyolipomas, of thoracic spine, with extracranial extension to thoracic cavity, 391
Anthropometry, quantitative, of subatlantal cervical longitudinal ligaments, 893
Antibiotics, prophylactic role in spinal instrumentation, 653
Anti-inflammatory drugs, inhibitory effects on cauda equina adhesion following laminectomy, 298
Anulus fibrosus
  biomechanics of compression-induced degeneration of intervertebral discs and, 2493
  disruption of, intervertebral disc high-intensity zone association with, 2074
  inflammatory cells in full-thickness anulus injury in pigs and, 524
  stiffness of lumbar spinal motion segments with high-intensity zone in, 2167
  tears of, lumbar spine magnetic resonance imaging demonstration of, 453
Apoptosis, in motor neuron cell line, 151
Arm pain, nonoperative treatment of, 2746
Arthritis, rheumatoid, cervical spine involvement in
  lesions related to systemic progression and, 2052
  spin echo magnetic resonance imaging *versus* tomography for evaluating, 1237
Arthrodesis
  lumbosacral, pedicle screws for, in elderly, 1470
  rigid spinal instrumentation and solid bony fusion and, 767
  segmental, kinematic study of cervical spine before and after, 1649
  thoracic, for adolescent idiopathic scoliosis, coronal and sagittal balance and, 2063
  in ultrasonography, 1142
Aspiration, suction, percutaneous, for pyogenic spondylitis, 1600
Athletics, helmet and shoulder pad removal from player with suspected cervical spine injury and, 1729
Atlantoaxial joint
  dislocation of
    rotatory, 1494
    transoral joint release of, with posterior reduction and fusion for late infantile atlantoaxial rotatory fixation, 1485
  instability of
    anterior transarticular cervical screw fixation for, 1229
    complicating radiation therapy for recurrent nasopharyngeal carcinoma, 1280
  subluxation of, rotary, management in pediatric patients, 2174
Atlas
  burst fractures of, rigid cervical collar for, 1963
  vertebral artery groove of, quantitative anatomy of, relation to posterior atlantoaxial approach, 320

B

Back injuries. *See also* Back pain; Low back pain
  compensable, without serious associated injuries and, diagnostic and management procedures for, 93
  in nurses, components of initial and residual disability after, 2118
  after posterior lumbar spine surgery, preventive measures of, 2282
Back muscles, fatigability of, muscle fiber size and type distribution influence on electromyographic measures of, 576
Back pain. *See also* Low back pain
  age at which back pain becomes common and, 228
  claim rates of compensable back injuries by age, gender, occupation, and industry related to return-to-work experience and, 1572
  in college athletes, correlation of lower extremity overuse or acquired ligamentous laxity with back pain and, 828
  intervertebral discs and
    high-intensity zone association with, 2074

    opioid therapy for, 2591
    prediction of which chronic back patients should be offered tertiary rehabilitation in functional restoration programs and, 1775
  in primary care
    lay person-led self-management group intervention for patients in, 2608
    patient characteristics, content of initial visit, and short-term outcomes with, 463
  sick leave rates caused by back pain among pregnant Swedish women after amelioration of social benefits and, 1986
Betamethasone, epidural injection of, in lumbar radiculopathy, 877
Biodynamics
  electromyogram-driven model of spinal loading, predictions of, 423
  moment-generating capacity of human neck muscles and, muscle morphometry and moment areas and, 412
Biomechanics
  of anterior cervical spine stabilization, 886
  of anterior thoracic spinal fusion, video-assisted thoracoscopy *versus* open thoracotomy for, 1333
  of anterior thoracolumbar screw fixation, 1829
  anterior vertebral body screw pullout testing and, 908
  cadaverous cancellous bone strength changes in relation to time and, 1215
  of C1-C2 posterior fixations using cable, graft, and screw combinations, 1946
  cervical interbody fusion cages and, with and without bone morphogenetic protein, 758
  cervical spine models for research in, 2684
  cervical spine stability and, anteromedial foraminotomy and uncovertebral joints and, 1559
  comparison of open and thoracoscopic anterior spinal release in goat model and, 530
  of compression-induced degeneration of intervertebral discs, 2493
  effects of spinal fixation and destabilization on biomechanical and histologic properties of spinal ligaments and, 672
  estimation of trunk muscle forces and spinal loads during fatiguing repetitive trunk exertions and, 2563
  of failed pedicle screw revision using hydroxyapatite cement, 1657
  of graft loading characteristics for anterior cervical discectomy and fusion, comparison of traditional and reverse grafting techniques for, 2450
  influence of muscle forces on loads in internal spinal fixation and, 537
  intersegmental trunk muscle importance for stability of lumbar spine and, 1937
  intramuscular pressure in erector spinae and intra-abdominal pressure related to posture and load and, 2580
  kinematic study of cervical spine before and after segmental arthrodesis and, 1649
  of ligamento-muscular stabilizing system of spine, 2552
  of lumbar functional spinal unit axial rotation response, constrained testing conditions affecting, 1155
  moments and forces during pedicle screw insertion and, 1220
  motion analysis of cervical facet joint and, 430
  multicycle mechanical performance of titanium and stainless steel transpedicular spine implants and, 782
  of occipital screw fixation, quantitative anatomy of occiput and, 1100
  pathomechanism of isthmic lumbar spondylolisthesis and, 1442
  pedicle and posterior arch effects on vertebral body strength predictions in finite element modeling and, 899
  preoperative estimation of screw fixation strength in vertebral bodies and, 174
  quantitative anthropometry of subatlantal cervical longitudinal ligaments and, 893
  of revision pedicle screws, 1374
  rigid spinal instrumentation and solid bony fusion and, 767
  simulation of whiplash trauma using whole cervical spine specimens and, 17
  stability of spinal instrumentation and
    posterior, effects on adjacent motion segments in lumbosacral spine and, 1550
    in tumor vertebral body replacement surgery, 543
  stiffness of lumbar spinal motion segments with high-intensity zone in anulus fibrosus, 2167
  strengths of lumbosacral fixation with one and two triangulated screws and, 2289

of subarachnoid space and cervical cord, kinematic magnetic resonance imaging of, 556
testing of lumbosacral spine and, 1721
thoracic spine flexibility and, endoscopic discectomy to increase, 9
thoracolumbar burst fracture reinforcement with calcium phosphate cement and, 664
of translaminar facet joint fixation, with poly-L-lactide pins, screws, and pedicle fixation, 1307
trunk muscle co-contraction increases during fatiguing, isometric, lateral bend exertions and, 774
tumorous destruction of vertebral body and, pathologic fracture threshold resulting from, human cadaver model for determining, 1209
Biopsy, of spine, computed tomography-guided, 81
Blindness, cortical, bilateral, after lumbar surgery, 1807
Blood contamination, of health care workers, in surgery, 1261
Blood pressure, patient position and hypotensive anesthesia effects on inferior vena caval pressure and, 941
Bone, cancellous
cadaverous, strength changes in relation to time and, 1215
fresh frozen corticocancellous allografts, for cervical interbody spinal fusion, 2295
Bone grafts
autologous, in staged scoliosis surgery, 1793
fresh frozen corticocancellous allografts, for cervical interbody spinal fusion, 2295
Bone matrix gel, demineralized, posterolateral experimental lumbar fusion with, 159
Bone mineral density, correlation between intervertebral disc degeneration and, 856
Bone morphogenetic protein, cervical interbody fusion cages with and without, 758
Botulinum toxin, for cervicothoracic myofascial pain syndrome and, 1662
Braces
after spinal fusion for degenerative problems of lumbar spine, controversy concerning, 1426
TLSO, Charleston, and Milwaukee, for adolescent scoliosis, 2404
Brainstem, compromise of, compression of upper cervical spinal cord causing symptoms of, 1497
Brucella granuloma, lumbar spinal root compression caused by, 491
Bupivacaine, epidural injection of, in lumbar radiculopathy, 877

C

Cable-screw construct, repair of pars interarticularis defect with, 263
Calcium phosphate cement, thoracolumbar burst fracture reinforcement with, 664
Cancellous bone
cadaverous, strength changes in relation to time and, 1215
fresh frozen corticocancellous allografts, for cervical interbody spinal fusion, 2295
Cardiac tamponade, fatal, associated with posterior spinal instrumentation, 2226
Cauda equina
adhesion following laminectomy, inhibitory effects of anti-inflammatory drugs and, 298
chronic double-level compression of, 1641
lidocaine effects on nerve root injury induced by nucleus pulposus, 2383
posterior epidural migration of extruded lumbar disc fragment causing, 378
Cavernous hemangiomas, epidural, 1136
Cell death, in motor neuron cell line, 151
Cerebral palsy, total-body-involvement, scoliosis in, 1412
Cervical collars, for stable burst fractures of atlas, 1963
Cervical nerve, anatomic location of dorsal ramus and its relation to the superior articular process of the lateral mass and, 1968
Cervical spinal cord, biomechanics of, kinematic magnetic resonance imaging of, 556
Cervical spine. *See also* Cervicothoracic spine
amyloidoma of, 133
anatomy of
C2 nerve root ganglion and, 649
location of dorsal ramus of cervical nerve and its relation to the superior articular process of the lateral mass and, 1968

current knowledge of, 2661
degenerative disease of, surgery in, 2674
disc disease in, painful, anterior discectomy and fusion for, 2047
discectomy in
anterior, biomechanics of graft loading characteristics for, comparison of traditional and reverse grafting techniques for, 2450
noninstrumented, outcome analysis of, 188
disc herniation in
indication and clinical results of laminoplasty for cervical myelopathy caused by herniation with developmental canal stenosis and, 2391
regression of, magnetic resonance imaging of, 990
dislocation of
following laminectomy, in von Recklinghausen's disease, 273
reduction technique for uni- and biarticular dislocations of lower cervical spine, 949
dura mater of, direct innervation of sensory fibers from dorsal root ganglia of, 1524
epidural steroid injection in, intrinsic spinal cord injury with, 2137
four-level corpectomy and, 2455
functional outcome of surgically and conservatively managed dens fractures of, 1837
hardware failure in anterior cervical plate fixation and, significance of, 181
helmet and shoulder pad removal from player with suspected cervical spine injury and, 1729
imaging of, 2701
inflammatory disorders of, 2755
injury threshold for, effect of age and loading rate on, 1957
intensive training, physiotherapy, or manipulation for chronic neurologic pain and, 311
involvement in rheumatoid arthritis, spin echo magnetic resonance imaging *versus* tomography for evaluating, 1237
junctional plate in, anterior, 2462
kinematic study of, before and after segmental arthrodesis, 1649
kyphosis in, postlaminectomy, 2738
lesions related to systemic progression in rheumatoid arthritis and, 2052
lower, reduction technique for uni- and biarticular dislocations of, 949
models of, for biomechanical research, 2684
morphometry of human neck muscles and, 1314
motion analysis of facet joint and, 430
myelopathy of, expansive midline T-saw laminoplasty for management of, 32
natural history of cervical foramen in symptomatic patients aged 20-60 years, as measured by magnetic resonance imaging, 2180
pediatric atlantoaxial rotary subluxation management and, 2174
pedicle screws in, cervicothoracic, for reconstruction of complex cervical spine pathology, 1596
plate fixation of
in degenerative disease, reoperation after, 911
posterior articular, of subaxial cervical spine, complications of, 193
porous tantalum implants within, radiographic and imaging characteristics of, 1245
prediction of load sharing among components of C5-C6 motion segment and, finite element approach for, 684
proliferating cell nuclear antigen in hypertrophied segments of, localization in posterior longitudinal ligament, 305
quantitative anatomy of vertebral artery groove of atlas, relation to posterior atlantoaxial approach, 320
radiculopathy of, after laminoplasty, 2057
reliability of magnetic resonance imaging in predicting disc material posterior to posterior longitudinal ligament in, 2468
rigid cervical collars for stable burst fractures of atlas and, 1963
spondylosis of
amyotrophic, magnetic resonance imaging demonstration of intrinsic cord pathology in, 448
decompression for acute incomplete spinal cord injury in, 2398
myelopathy and
pathophysiology of, 2730
spinal deformity and instability after multilevel laminectomy for, 440
stability of, anteromedial foraminotomy and uncovertebral joints in, 1559
surgery of
in degenerative disease, 2674
reduction technique for uni- and biarticular dislocations of lower cervical spine, 949
variation in surgical opinion regarding management of selected cervical spine injuries, 975
symptom provocation of fluoroscopically guided cervical nerve root stimulation and, dynatomal and dermatomal maps and, 2235
three-dimensional flexibility characteristics of, *in vivo*, 216
trauma to, 2713
variation in surgical opinion regarding management of selected injuries and, 975
vertebral artery injuries following, long-term evaluation using magnetic resonance imaging, 789
whiplash injury and. *See* Whiplash injury
tumors of, 2767

reliability of axial landmarks for pedicle screw placement in lower lumbar spine and, 60
revision, 1374
in thoracic spine, anatomic considerations of placement of, Roy-Camille technique *versus* open-lamina technique and, 1065
thoracolumbar and lumbar, pediatric, complications of, 1566
translaminar facet joint fixation using, 1307
Phospholipase A2
sensitivity of dorsal root and dorsal root ganglion to, 1297
steroid effects on, in animal model of radiculopathy, 1191
Physical examination, epidemiology and neurodiagnostics and, 2663
Physiotherapy
for back pain
comparison of cost and effectiveness with chiropractic as primary management, 1875
efficiency and costs of medical exercise therapy, conventional physiotherapy, and self-exercise for chronic low back pain and, 2616
for neck pain, chronic, 311
Pinealectomy, changes in serum melatonin levels in response to, scoliosis development and, 2377
Pins, translaminar facet joint fixation using, 1307
Pirognoff, Nickolay Ivanovich, 2143
Plasma cell myeloma, spontaneous epidural hematoma with spinal cord compression complicating, 2432
Plate fixation, cervical
in degenerative disease, reoperation after, 911
hardware failure in anterior cervical plate fixation and, significance of, 181
posterior articular, of subaxial cervical spine, complications of, 193
vertebral body depth of cervical spine and, 2299
Posterior arch, effects on vertebral body strength predictions in finite element modeling, 899
Posture
intramuscular pressure in erector spinae and intra-abdominal pressure related to, 2580
postural control in patients with chronic low back pain and, 2081
Practice guidelines, patient preferences and, 1073
Presidential Address, 2232
Primary care, back pain in
lay person-led self-management group intervention for, 2608
patient characteristics, content of initial visit, and short-term outcomes with, 463
Proliferating cell nuclear antigen, in hypertrophied segments of cervical spine, localization in posterior longitudinal ligament, 305
Proteoglycans
effect of compressive force applied to intervertebral discs *in vivo* and, 2524
of intervertebral discs, in diabetic patients, back pain and, 849
Pseudarthrosis
of lumbar spine, 2352
vertebral, in osteoporosis, 2201
Pseudomeningocele, nerve root entrapment by, after lumbar discectomy, 1501
Psoas major muscle, cross-sectional area of, in unilateral sciatica caused by disc herniation, 928
Pyogenic infection, of cervical spine, tuberculosis with, 139

R

Radiation therapy, for recurrent nasopharyngeal carcinoma, atlantoaxial instability complicating, 1280
Radiculopathy
cervical, after laminoplasty, 2057
lumbar
epidural injection of betamethasone or bupivacaine in, 877
sensory nerve fiber function in, 348
steroid effects on phospholipase A2 and, 1191
Radiography
angled, lumbosacral fusion mass assessment by, 842
in cervical instability, correlation of magnetic resonance imaging with, 1734
lateral radiographs for determination of optimal screw length in transarticular screw fixation of C1-C2 and, 2190
in lordosis to pelvic radius, reliability in measuring on standing lateral radiographs and, 1750
manual *versus* computer-assisted radiographic measurement of deformity and, 551
of porous tantalum implants within cervical spine, 1245
of screw fixation in cervical spine
lateral mass screw placement and, 458
lateral radiographs for determination of optimal transarticular C1-C2 screw length and, 2190
Reflexes, spinal, regional correspondence between ventral portion of lumbar intervertebral disc and groin mediated by, 1853
Rehabilitation
prediction of which chronic back patients should be offered tertiary rehabilitation in functional restoration programs, 1775
range of motion and motion patterns in low back pain before and after, 2631
socioeconomic outcomes of early *versus* late restoration in compensation spinal disorders and, 2110
Return to work. *See* Occupational health
Rheumatoid arthritis, cervical spine involvement in
lesions related to systemic progression and, 2052
spin echo magnetic resonance imaging *versus* tomography for evaluating, 1237
Roy-Camille technique, open-lamina technique *versus*, for thoracic spine pedicle screw placement, 1065

S

Sacral spine, transpedicular endplate screws in, ideal position of, in Jackson's intrasacral fixation, 2123
Sacroiliac joint
  imaging assessment of screw placement relative to neuroforamen and, 585
  pain in, neuroaugmentation in management of, 1069
  position of, manipulation and, 1124
  regional pain in, unilateral hip rotation range of motion asymmetry with, 1009
Sacrum
  giant cell tumor of, 1609
  internal bony architecture of, 971
Sarcoidosis, spinal, instability and paraplegia caused by, surgery for, 1711
Saskatchewan Health and Back Pain Survey, 1689, 1860
Scarring, following lumbar discectomy, influence of fibrinolytic factors on, 1464
Schmorl's nodes, pathogenesis of, in relation to acute trauma, 2272
Sciatica
  extraspinal causes of, 494
  sciatic hernia and, 2134
  unilateral, caused by disc herniation, cross-sectional area of psoas major muscle in, 928

  metallic artifacts with magnetic resonance imaging and, 692
  for neuromuscular scoliosis, results and morbidity of patients undergoing, 2308
  posterolateral, Graf ligamentoplasty compared with, in low back pain, 1172
  for scoliosis, vertebral fracture in fused spine and, 270
  solid, spinal kinematics and, 767
  thoracoscopic *versus* open thoracic discectomy in live ovine model for anterior fusion and, 1699
  uninstrumented, single-level, microdecompression and, for spinal canal stenosis with degenerative spondylolisthesis, 2243
Spinal instability
  atlantoaxial
    anterior transarticular cervical screw fixation for, 1229
    complicating radiation therapy for recurrent nasopharyngeal carcinoma, 1280
  caused by spinal sarcoidosis, surgery for, 1711
  cervical
    disc degeneration and, correlation of magnetic resonance imaging with radiography in, 1734
    following multilevel laminectomy, 440
Spinal instrumentation
  hook strategies in multi-hood instrumentation for adolescent idiopathic scoliosis and, effects of three-dimensional assessment on, 201
  mechanical testing of, 2263
  posterior
    fatal cardiac tamponade associated with, 2226
    stability and effects on adjacent motion segments in lumbosacral spine, 1550
  rigid, spinal kinematics and, 767
  role of prophylactic antibiotics in, 653
  single-rod, late complication after, 1503
  stability potential of, in tumor vertebral body replacement surgery, 543
  tantalum and titanium, magnetic resonance imaging compared with computed tomography image quality after implantation of, 1684
Spinal muscles assessment using surface electromyographic spectral color mapping, 1768
Spinal reflexes, regional correspondence between ventral portion of lumbar intervertebral disc and groin mediated by, 1853
Spinal release, anterior, open and thoracoscopic, comparison in goat model, 530

Spinal stenosis
with degenerative spondylolisthesis, microdecompression and uninstrumented spinal fusion single-level for, 2243
lumbar
of L1-L2 and L2-L3 spaces, degenerative, L5 nerve root compression caused by, 1891
measurement of baseline functional status and surgical outcome using exercise treadmill in, 244
spinal canal stenosis associated with progressive degenerative changes and, 501
Spine biopsy, computed tomography-guided, 81
Spinopelvic balance, over hip axis, reliability in measuring lordosis to pelvic radius and, on standing lateral radiographs, 1750
Spinous process, osteomyelitis of, low back pain caused by, 839
Spondylitis
due to actinomycosis, 487
pyogenic, percutaneous suction aspiration and drainage for, 1600
Spondylodiscitis, after lumbar discectomy, 615
Spondylolisthesis
degenerative
pathoanatomic mechanisms of, 1447
spinal stenosis with, microdecompression and uninstrumented spinal fusion single-level for, 2243
lumbar, isthmic, pathomechanism of, 1442
Spondylolysis, isthmic, pars interarticularis association with, 1635
Spondylosis, cervical
amyotrophic, magnetic resonance imaging demonstration of intrinsic cord pathology in, 448
decompression for acute incomplete spinal cord injury in, 2398
myelopathy and, pathophysiology of, 2730
spinal deformity and instability after multilevel cervical laminectomy for spondylitic myelopathy and, 440
Sports, helmet and shoulder pad removal from player with suspected cervical spine injury and, 1729
Stabilization
of anterior cervical spine, biomechanics of, 886
of lumbar spine, same-day anterior decompression and posterior stabilization for vertebral osteomyelitis and, 1885
Steroids
effects on phospholipase A2, in animal model of radiculopathy, 1191
spontaneous resorption of herniated discs and, 870
Subarachnoid space
biomechanics of, kinematic magnetic resonance imaging of, 556
discovery of unreported lesion in, ultrafine flexible spinal endoscope and, 2358
Suction, percutaneous, for pyogenic spondylitis, 1600
Supine spine bending, to determine spine flexibility, traction *versus*, 804
Surgery. *See also specific regions of spine and specific procedures*
functional outcome of surgically and conservatively managed dens fractures and, 1837
for idiopathic scoliosis, monitoring somatosensory- and motor-evoked potentials during, 1392
infection rates and, surveillance methods and, 366
for instability and paraplegia caused by spinal sarcoidosis, 1711
